Project Description
The Utah Department of Health (UDOH) is one of CDC’s ten Foodborne Diseases Centers for Outbreak Response Enhancement (FoodCORE) centers. The FoodCORE centers work together to develop new and better methods to detect, investigate, respond to, and control multistate outbreaks of foodborne diseases. One of the objectives of the FoodCORE project is to improve investigation and interviewing of cases of *Salmonella*, *E.coli*, and *Listeria*.

UDOH is currently recruiting an Enteric Disease Intern (EDI) to assist with the FoodCORE project. The EDI will: build knowledge of enteric diseases and their impact; learn the art and science of case interviewing; participate in outbreak investigations and after-action activities; become familiar with investigative tools and UDOH’s communicable disease surveillance system; and acquire hands-on epidemiology experience.

Responsibilities:
1. Perform enteric disease interviews.
2. Assist with investigative response during foodborne disease outbreaks.
3. Assist with other enteric disease projects and reports as needed.

Prerequisites
**Required:** Bachelor’s degree; great inter-personal skills; knowledge of Microsoft Word and Excel; highly motivated, independent worker.
**Preferred:** Graduate level student or MPH graduate; Spanish speaking; experience conducting interviews.

Start Date | July 2020 | End Date | TBD
---|---|---|---
Hours per week | 20-30 | Pay rate | $15/hour
Other Details | Hours are flexible, but UDOH will expect regular hours weekly. Minimum 6-month commitment required. If funding allows, this opportunity may be extended.
To Apply | Email a letter of interest and CV to Lisa Reyes, lreyes@utah.gov by July 6, 2020.
