

Internship Announcement

Offered Position: Glass Recycling Education and Outreach Intern

Description

Momentum Recycling's mission is to move our community towards zero waste by providing materials collection, processing and education. In 2012, Momentum Recycling responded to a growing community demand for better glass recycling options. Our new glass recycling plant and accompanying curbside glass service is starting to meet this demand. The company's objectives are as follows:

- Collection of recyclable and compostable materials
- Educations of clients and the public about the importance of recycling and composting
- Processing postconsumer glass which is used to replace virgin materials in the manufacture of new products
- Promotion of clients' sustainability efforts in the larger community.

Intern Responsibilities

Getting acquainted with Momentum Recycling (20% of internship)

- Momentum's history, Mission, and objectives
- Commercial recycling; sales overview
- Glass recycling plant; glass cullet quality analysis testing, plant operations
