

**School of Biological Sciences Graduate Program**  
**Faculty who are Recruiting Graduate Students for Fall 2026**

|                          |                                                                                                                                                                                    |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Frederick Adler</b>   | Coevolutionary Biology, Ecology & Conservation Biology, Evolution & Biodiversity                                                                                                   |
| <b>William Anderegg</b>  | Ecology & Conservation Biology, Ecosystem Science, Physiology & Functional Morphology, Plant Biology                                                                               |
| <b>David Blair</b>       | Biochemistry & Structural Biology, Microbial Biology                                                                                                                               |
| <b>Jessica Brown</b>     | Coevolutionary Biology , Genetics & Genomics, Microbial Biology,                                                                                                                   |
| <b>Sophie Caron</b>      | Behavior & Neurobiology, Cell Biology, Developmental Biology, Genetics & Genomics                                                                                                  |
| <b>Richard Clark</b>     | Coevolutionary Biology, Evolution & Biodiversity, Genetics & Genomics, Plant Biology                                                                                               |
| <b>Colleen Farmer</b>    | Evolution & Biodiversity, Physiology & Functional Morphology                                                                                                                       |
| <b>Martin Horvath</b>    | Biochemistry & Structural Biology                                                                                                                                                  |
| <b>Erik Jorgensen</b>    | Behavior & Neurobiology, Cell Biology, Genetics & Genomics                                                                                                                         |
| <b>Talia Karasov</b>     | Coevolutionary Biology, Evolution & Biodiversity, Genetics & Genomics, Microbial Biology, Plant Biology                                                                            |
| <b>Matthew Mulvey</b>    | Cell Biology, Coevolutionary Biology, Genetics & Genomics, Microbial Biology                                                                                                       |
| <b>Peter Pellitier</b>   | Community and Ecosystem Ecology, Fungal Biology, Genetics & Genomics, Plant Biology                                                                                                |
| <b>Nitin Phadnis</b>     | Cell Biology, Developmental Biology, Evolution & Biodiversity, Genetics & Genomics                                                                                                 |
| <b>Jody Reimer</b>       | Ecology & Conservation Biology, Ecosystem Science, Evolution & Biodiversity, Microbial Biology                                                                                     |
| <b>Ofer Rog</b>          | Biochemistry & Structural Biology, Cell Biology, Developmental Biology, Genetics & Genomics                                                                                        |
| <b>Gary Rose</b>         | Behavior & Neurobiology, Evolution & Biodiversity, Physiology & Functional Morphology                                                                                              |
| <b>Cagan Sekercioglu</b> | Ecology & Conservation Biology, Ecosystem Science, Evolution & Biodiversity                                                                                                        |
| <b>Leslie Sieburth</b>   | Cell Biology, Developmental Biology, Genetics & Genomics, Plant Biology                                                                                                            |
| <b>Neil Vickers</b>      | Behavior & Neurobiology, Physiology & Functional Morphology                                                                                                                        |
| <b>Michael Werner</b>    | Behavior & Neurobiology, Biochemistry & Structural Biology, Cell Biology, Developmental Biology, Evolution & Biodiversity, Genetics & Genomics, Physiology & Functional Morphology |
| <b>Ayako Yamaguchi</b>   | Behavior & Neurobiology, Cell Biology, Physiology & Functional Morphology                                                                                                          |
| <b>Chan Yul Yoo</b>      | Cell Biology, Developmental Biology, Genetics & Genomics, Plant Biology                                                                                                            |
| <b>Heejin Yoo</b>        | Biochemistry & Structural Biology, Genetics & Genomics, Microbial Biology, Plant Biology                                                                                           |
